

NORTHERN CALIFORNIA CRITICAL FACILITIES ROUND TABLE

The need to network with the High Tech and Data Center Industries

Purpose: The charter of this new organization is to provide an open forum for all participants to be informed and discuss mission critical technologies and to come together to share information between participants to help one another discover solutions to the challenges of the individuals day-to-day operations and be informed and discuss new technologies of interest.

Why Me: Your selection was based on your involvement in the technical management/operation of a critical facility, i.e. computer centers, research/development facilities, etc.

Individuals Organizing Round Table and the Opening Event:

Charles H. Krieger PE, [retired], formerly President & CEO of Charles H. Krieger and Associates, Inc.

Horst Pfendt [retired], formerly with Chevron

Bruce Myatt PE Advisor, with EYPMCF

Steve Johnson, formerly associated as SVP with Frontier Global Center

The objective is to establish a core group of professionals that manage critical operations who are dedicated to the mutual success of all members of the group and advancing the ‘State of the Art’ of their facilities

We value your participation and contributions highly, and we want to assure you that you will find the times at the meetings interesting and informative and you will be pleased with what this group will offer you and each other.

Here are some details:

- It is intended that there will be no financial commitments of the members, with meetings to be held on a quarterly basis, with one of the participating member’s facilities hosting the meetings, on a rotational basis. Since we had no participant host for the first organizational meeting, we are planning to meet at the World Trade Club, which would include a ‘no host’ lunch [for those wishing to stay] and would cost each participant around \$30.00
- It is intended to invite 50 individuals, with 30 or so attending each meeting. Subjects to be discussed, based on member’s recommendations, or an expert in selected topics invited to make a presentation. Since members will have varied interests, it is assumed that only members interested in the presented topic will attend.
- Only individuals associated with a critical facility or involved in research and development will be invited to join, no individual vendors associated with a manufacturer, or having commercial interests will be invited to join.
